PROFILE

_____

Diligent, versatile and results-driven professional with a strong automotive background, including technical troubleshooting expertise and certifications in Auto, Diesel, and Toyota servicing. My experience at Tesla and Rivian exposed me to cutting-edge automotive technologies, sparking my passion for software development. I've recently completed a rigorous 3-month coding bootcamp at UC Berkeley Extension, focusing on Automotive Technology and Software Development, equipping me with full-stack development skills and deep software knowledge. I'm eager to transition into software development, aiming to blend my technical acumen from the automotive industry with innovative problem-solving abilities to contribute to a forward-thinking tech team and drive progress in software development.

EDUCATION

_____

Jun 2023 - Sep 2023
UC Berkeley Extension | Coding BootCamp, Full Stack Developer
Concentration: Full Stack Development Front-end/Back-end

2014 – 2016 Universal Technical Institute, Sacramento, CA
Concentration: Automotive, Diesel, and Toyota

WORK EXPERIENCE

_____

2021-2023 RIVIAN South San Francisco
Field Service Technician IV
- Shop lead supporting team implementing new process standard/service flows to reduce dwell times
- Led Factory support for careline 1 and end of line, utilizing Hermes and Python for ECU flashing.

Automotive Technician
- Managed daily opening/closing duties for automotive warehouse
- Performed used vehicle inspections consisting of alignments and wheel/tire balancing
- Worked with body shops replacing engines, transmissions, AC systems, drive belts, and subframes

Technical Skills:
-Programming Languages: JavaScript (including ES6), TypeScript
-Web Development: HTML5, CSS, Bootstrap, Web APIs (REST)
-Version Control: Git and GitHub
-Databases: MySQL, Sequelize ORM, MongoDB, Mongoose ODM
-Front-End Framework: React and Redux
-Server-Side Technologies: Node.js, Express.js

Soft Skills:
- Problem-Solving
- Customer Service
- Pseudocode
- Teamwork
- Time Management

PROJECTS
_____
- Developed a full-stack e-commerce website using JavaScript, Node.js, Express.js, and MongoDB. Implemented user authentication, product catalog, and shopping cart functionality.

- Created a task manager application using React, HTML, and CSS. Utilized state management to organize tasks and set deadlines.

- Designed and built a personal portfolio website showcasing coding projects and skills using React and CSS.
